Installation

Remove the existing toilet seat and place the Numo Arms base plate over the pan, using the two rear holes to align with the pan holes. Locate the seat back over the base plate and pan securing the seat in the normal way with secure fixing bolts holding the seat.

NOTE:

Some older style seats may have a skirt to the sides which may prevent the seat sitting down flat on the front of the pan with the Numo Toilet Arm installation. You may choose to purchase a new seat (making sure it is flat on the underside) from your plumbing supplier or hardware store.

Warning: Uneven or unsecure fixing of the Numo Arms to the toilet base may result in injury to the user or damage to the Numo arms or toilet.

Usage

The **KA410NAS Numo Arms** should be installed and used as per manufacturers recommendations to ensure safe and long lasting trouble free usage of the product.

Before Use

Heavy or uneven weight distribution may cause stress to the nylon or metal fixing bolts and may eventually result in damage to the product.
